

# Star Mobiles!

YOU'LL NEED: CARDSTOCK, RIBBON OR STRING, TAPE, PENCIL, SHAPE TEMPLATES (OPTIONAL), SCISSORS

THIS  
SHAPE IS  
CALLED A  
SPIRAL!

- **CUT** a circle out of a piece of cardstock.
- Create a **SPIRAL**, the shape of a snail's shell, from the outside of the circle to the inside, about 2 inches wide. **DRAW** the spiral in pencil first so that you know where to cut!
- **CUT** the spiral shape out, so you have a long, curly piece of paper. Make sure to leave some space at the center.
- Cut a foot long piece of yarn or string into several shorter pieces. Tie or tape one onto the center of your spiral so that you can hang it up.
- **TAPE** nighttime shapes like stars and moons onto the other pieces of ribbon, and then tape them around your spiral to make a mobile.
- Hang up your whirligig from the center, and watch it go!
