

# HANDPRINT CAMPFIRE

YOU'LL NEED: CONSTRUCTION PAPER, SCISSORS, GLUE STICK, MARKERS OR CRAYONS

- Start by **TRACING** your handprint three times- you can use three different flame-colored papers, or use white and then color the handprints to look like flames.
- **CUT** out your handprints, and then cut three **RECTANGLES** (again, you can use brown, or use white and color it to look like wood.)
- Stack the wood logs and glue so that they are fanning out, like a campfire! Then glue the flames on top fanning out to look like fire!
- Imagine warming up or making smores with your paper campfire.
