

Cardboard Tube Cars

YOU'LL NEED: CARDBOARD TUBE, SCISSORS, MARKERS OR PAINT, GLUE OR TAPE, PAPER SHAPES

- Use markers or paint to color the outside of a cardboard tube. You can use one color, or make a design!
- Once it's colorful, have a grownup help you cut a **RECTANGLE** out of the top. Cut **3 sides** to start, and then fold the cut portion up like a flap. Cut it down in size and fold it up so that it looks like a **WINDSHIELD**.
- Cut 4 circles for wheels- or find something around the house that you can use! Maybe a lid, a button, or a pompom. Glue or tape the wheels to the bottom sides of the car. Decorate however else you'd like. For more fun, can you create a track or roadway for your car to drive along? Try making one on paper or out of blocks!
