

# FOLDED PAPER LANTERNS

YOU'LL NEED: CONSTRUCTION PAPER,  
SCISSORS, GLUE, TAPE OR STAPLER

- **CUT** one piece of paper 1 inch smaller on the short edge. That strip will be the handle.
- **FOLD** the remaining paper in half, and draw a line about 1 inch from the open edge.

- Make a series of **CUTS** going from the **FOLDED EDGE** towards the open edge, **STOPPING AT THE LINE**. Repeat those cuts all the way down the paper. Unfold the paper.

- **ROLL** the paper so the short edges meet, and then press it down a little bit, so that the fold in the middle sticks out to the sides.
- Glue the extra strip and any decorations you want to add on to the outside. Staple a border and the handle on to the top.
