

Silly Bendy Snakes!

YOU'LL NEED: CONSTRUCTION PAPER, GLUE, SCISSORS, MARKERS OR CRAYONS, GOOGLY EYES

1. FOLD & DECORATE

- **CUT** a piece of construction paper in half, **VERTICALLY**.
- **FOLD** the half-sheet vertically again, then open it up, and **FOLD** each edge in towards the middle fold. Now your paper is divided into four columns.
- **COLOR** designs on the 2 middle columns of the paper. What will your snake look like?

2. CUT

- **REFOLD** along the **MIDDLE** fold, so that your paper is folded in half with your drawing on the **OUTSIDE**. You're going to make some cuts along the fold.
- Leave about **2 INCHES** from one end to be the head of your snake. Then, carefully **CUT** a slit from the folded part of the paper down to the fold-mark. Make these slits about **1 inch** apart all the way down the rest of your snake.

3. GLUE

- Flip your snake over to the plain side and apply **GLUE** all along the far-left column. Carefully fold your snake around in a circle and **PRESS** the top of the far-right column onto the glue. When you're done, you should have a triangle shaped tube.
- Cut out a tongue, and place the end right inside the mouth part of your snake. Put some glue on top of the tongue, and **PRESS** the top down, so you close off the mouth. You can add googly eyes, or draw some on. Bend your snake to watch her **WIGGLE!**
