

# Fingerprint Bug Jar!

YOU'LL NEED: PAPER, INK PAD OR WASHABLE MARKERS, SCISSORS, CONTACT PAPER OR CLEAR PACKING TAPE, YARN

## 1. STAMP YOUR BUGS

- **DRAW** a large jar shape on a piece of paper to hold the bugs you're going to create!
- To make bugs, **PRESS** your fingers to an ink pad, or lightly color your finger tip in washable markers. **PRESS** your fingerprints onto the paper to make the bodies of your bugs- just like a **STAMP**. Try different shapes and color combinations to make all different types of bugs.

## 2. DECORATE

- **DRAW** eyes, antennae, legs, wings, or patterns onto your bugs. You can make them realistic or imaginative!
- **CUT** out each of the bugs you made.

## 3. MAKE A JAR

- To make a see-through jar, carefully **CUT** out the inside of your jar, leaving a frame.
  - Carefully **LAY OUT** contact paper or strips of clear tape so that the **STICKY** side faces up. Carefully lay down your frame on the sticky paper, and then add your cute little bugs to your jar!
  - Once everything is placed, carefully **LAY** another sheet of contact paper, or strips of tape, sticky side down, to close in your jar.
  - **TRIM** the extra tape from around your jar.
- If you want to hang up your jar, you can make two small holes in the top and **TIE** on a loop of yarn. Try hanging your jar in a window. Enjoy!
