

Heart Printing!

YOU'LL NEED: PAPER, CARDBOARD TUBE, PAINT, MARKERS, WASHI TAPE (OPTIONAL)

- Fold a point into the top **ROUND** end of paper tube to make the top of a heart shape.
- Then **SQUEEZE** the bottom round end, making a **POINT**. Now when you look straight at the end of the tube, the outline should look like a heart shape.
- You're going to print on your paper- you can make any pattern you want! You can use removable **TAPE** to make a design or shape on your paper. Once you're done painting, you can pull up the tape to see the blank paper shape underneath.
- Put some different colors of paint out into small dishes or a paper plate.

- **DIP** the heart-shaped end of your tube into paint, and press it down on your paper, like a stamp.
- You might want to use one stamper for each color you want to use.
- You can make any pattern you want, covering your paper in hearts and love.
- Once you're done, you can turn your heart printing into a card for someone special! You can also use this technique on wrapping paper, gift bags, or even fabric.
