

Clothespin Turkeys!

YOU'LL NEED: CLOTHESPIN, CONSTRUCTION PAPER, GLUE, LEAVES (REAL OR PAPER), GOOGLE EYES OR MARKER

- Cut a small **CIRCLE** out of paper for your turkey's head.
- Then, fold a small piece of paper in half, and cut a **TRIANGLE** out of the folded side. Open the shape a little, and it should look like a little beak.
- Glue the beak to the head, and add eyes- you can draw them, or use google eyes, stickers, or buttons.
- Then, glue the turkey's face to the **CLIP** end of a clothespin, on the flat part near the top.

- Next, head outside and search for some beautiful leaves! Large, wide leaves, like **MAPLE**, work great, or you can collect several smaller leaves for each turkey. How many different colors can you find? How many different shapes? If you don't have any fallen leaves nearby, you can also cut some out of paper.
- When you're done, **SQUEEZE** your clothespin open, and add some leaves. Shut your clothespin around your feathers, and look! You've got a turkey! You may even be able to make your turkey stand up on the non-feather end.
