

Crayon Resist Hats

YOU'LL NEED: THICK PAPER, CRAYON, WASHABLE MARKERS, SCISSORS, GLUE, COTTON BALLS

Crayons are made of wax. Water rolls off of wax. So everywhere you put the crayon will stay white when you paint on top!

- **DRAW** the shape of a hat onto a piece of thick paper.
- Then, **DRAW** some designs onto your hat in white crayon. You can make any patterns you like-- maybe you want to try **STRIPES** or **POLKA DOTS**!
- Next, use washable markers or watercolor paints to color over the wax.
- Once dry, **GLUE** pom-poms or cotton balls to the fuzzy parts of your hat.
