

# Snowman Windssock!

YOU'LL NEED: CARDBOARD TUBE, WHITE PAPER OR PAINT, SCRAP PAPER, MARKERS, TAPE OR GLUE STICK, TISSUE PAPER OR CREPE PAPER, YARN

Start by **PAINTING** a cardboard tube white.

Create a hanger by taping or tying a piece of yarn to each side of the tube's top.

**CUT** several strips of tissue or crepe paper, about a foot long, and about an inch wide. It doesn't have to be exact.

Apply **GLUE STICK** to the inside bottom of the tube, and stick your paper strips inside (you may need to add more glue as you go along). You could also tape them inside.

**CUT** out a carrot nose, and add it to your snowman. Then finish it off by drawing eyes and a mouth. What else could you add to your snowman?

If you hang up your creation, moving air will catch the paper strips so they flutter.
