

Flying Dragons!

YOU'LL NEED: CONSTRUCTION PAPER, CRAYONS OR MARKERS, TAPE, STREAMERS, RIBBONS OR PAPER STRIPS, POPSICLE STICK OR PLASTIC SPOON

1. CUT OUT YOUR DRAGON

- Start with a piece of construction paper cut longways about $\frac{2}{3}$ of a regular sheet.
- Fold over one end (about $\frac{1}{3}$) and trim the flap into a snout shape (we used a sideways letter B, but you can design your own!)
- Cut two triangles for ears, and maybe you'd like to cut out some teeth, too!

2. DECORATE

- You can design your dragon any way you'd like. Things to consider: where does your dragon live? What powers does it have? Is it super strong? Is it fantastically fast?

3. ASSEMBLE

- When you're done, you can tape on ears and teeth. Add a handle by taping a popsicle stick or plastic spoon underneath your dragon's mouth (where its fangs would be!)
- Add streamers, curled paper strips, fabric, or ribbons taped to your dragon's back. When you hold the stick handle, you can make your dragon fly!
